

Machining ▪ Fabricating ▪ Welding

Dennie's 23,000 square foot building is at 2543 State Route 21, Canandaigua, New York. In this facility we have the resources to provide quick turnaround on your rush jobs and accommodate work ranging from small parts to large machinery such as dies, molds, thermoformers and material handling and packaging equipment.

Since 1986 DenDie's has reliably delivered quality products at competitive prices. We have grown into a full service shop that handles jobs ranging from bending of wire to construction of custom built electrical, mechanical, pneumatic, and hydraulic machinery. We draw on our capabilities in design, precision machining, welding, fabrication, assembly and project management to get your job done.

Our facilities include:

- ✓ CNC Vertical Turret Lathes (3) up to 61" diameter swing
- ✓ CNC Horizontal Boring Mill (1) with 72" x 72" x 48" travel and 48" full contouring rotary tilting table
- ✓ CNC Vertical Machining Centers (8) up to 84" x 40" x 30" travel
- ✓ CNC Lathes (2) up to 30" swing and 39" between centers
- ✓ Manual Lathes (6) up to 39" diameter swing and 10' between centers
- ✓ Manual Vertical (5) and Horizontal Mills (2)
- ✓ Waterjet Cutter (1)
- ✓ Surface Grinders (3)
- ✓ Multi-axis Wire (1) and Sinker (1) EDM
- ✓ Mig (2), Tig (2), and Gas (2) Welders
- ✓ Plasma Cutter (1) up to 1" Stainless Steel
- ✓ Horizontal Saws (3) to 16" width
- ✓ Shears (3) to 6', Brakes (2) to 100 tons, and Rolls (2) to 3'
- ✓ CMM (1) 48" x 60" x 40" and Surface Plates (4) to 4' x 6'
- ✓ Loading Dock and High Bay Entrance
- ✓ Restricted Access Climate Controlled Area for Assembly and Test
- ✓ MasterCAM and High Speed Internet

We stock finished machined parts and assemblies for a number of our customers allowing us to provide same day delivery. For others we stock special raw materials to reduce the manufacturing leadtime of their customized products. We also inventory carbon steel, stainless steel, aluminum and plastic to quickly respond to emergency and prototype needs.

Dennie's best resource is our staff. Consisting of experienced machinists, welders and fabricators we are committed to making quality products. Low employee turnover means that you will

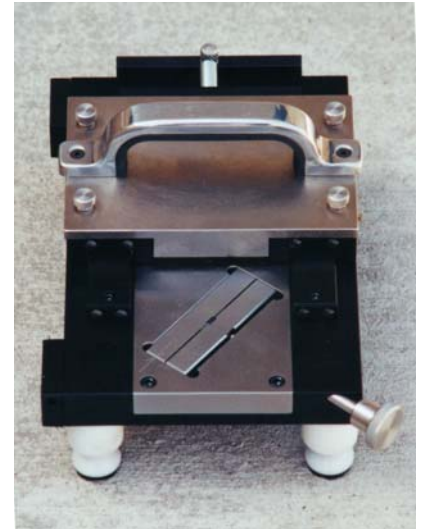

Precision turning of hardened alloy steel in our 48" Webster & Bennett VTL (61" maximum turning diameter). Dennie's also has a 42" G&L VTL and a 36" Schiess VTL.

work with the same dedicated people and they will get to know you and your requirements. You can turn your completed designs over to us and have confidence that we will finish them to your specifications.

We are also able to work with you in the design phase of your project. We are available to help generate design

solutions or work with you to reduce costs, improve quality and shorten leadtimes.

What can we do for you? Give us a call: ask to speak with Dennis Bristol, Howard Seitzinger or Richard Warkentin.

Knife assembly, designed and built by Dennie's, solved a customer's problem of precisely cutting thin test specimens.
